Pager Meeting March 17

(1) Status Quo

Tasks completed since last Meeting
- Finding relevant literature and get an overview of topic
- Research, Note-Taking, Structuring and Writing Process started

Changes & Challenges
- Extended Framework phase from 3 to 4 Weeks
- Decided to write Exploration Chapter only if enough pages left

Personal reflection
- **Past**: Having ups and downs - Note taking and Research felt very efficient, but needed time to get into the writing process (better now).
- **Future Objectives**: Goals of completing Framework by end of next weeks seems doable. It is however hard to estimate the speed of writing.
- **Challenge**: Need to be careful to define scope of methodology not to overburden myself. Better to do less tasks very well, than a bunch of tasks mediocre
- **Topic**: Surprisingly interested in the topic, had a pleasure reading fowler's work.

(2) Open Questions
- **Tests:** Discuss the importance of writing tests.
- **Methodology:** How much can be written before implementation?
- **Citation:** Reference Author or Author + Page Number?

(3) Outlook

First Week: Writing
- Finish writing theoretical framework (approx. 10 - 15 Pages)
- Communicate to Ronny when is able to start reading the draft

Second Week: Refactoring work
- Write Methodology the parts that are already possible (5 - 10 Pages)
- Formulate Hypotheses
- Broad Analysis (with Tools)

Next Meeting

Proposed Date: 31. March (in 2 weeks)

- Getting a Feedback on first draft (theory)
- Discuss upcoming Challenges / Questions regarding the refactor
